

First Quarter

Consolidated results
May 3rd, 2021

Key highlights of the period

Volume recovery in our Dx business in Brazil despite full COVID impact on the quarter

Positive tariff adjustment in Dx Rio and Ceará

FFO improvement due to lower net financial expenses and NWC

Net of Fx, EBITDA down 3% due to lower Gx business result

Renewed push for diversity at Board level

Feller Rate upgrades Enel Américas' rating

Merger and PTO¹ completed on April;

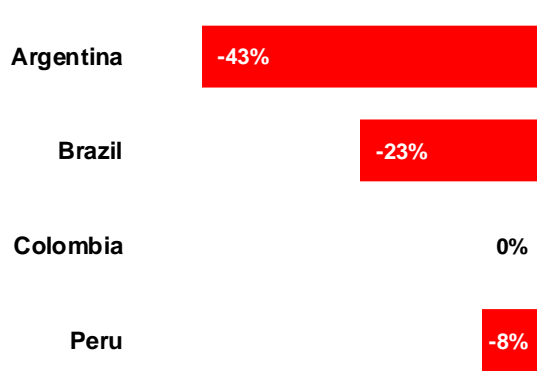

Adding 3.7 GW of renewable capacity, 3 new countries added to the perimeter

Macro-scenario

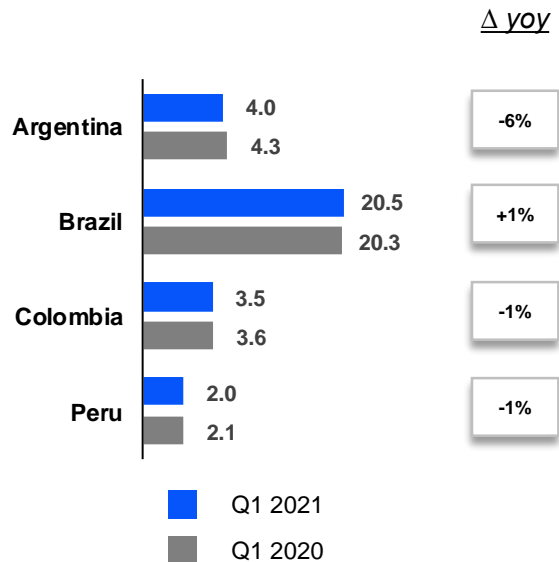

Operational figures broadly in line with last year, FX headwinds persist

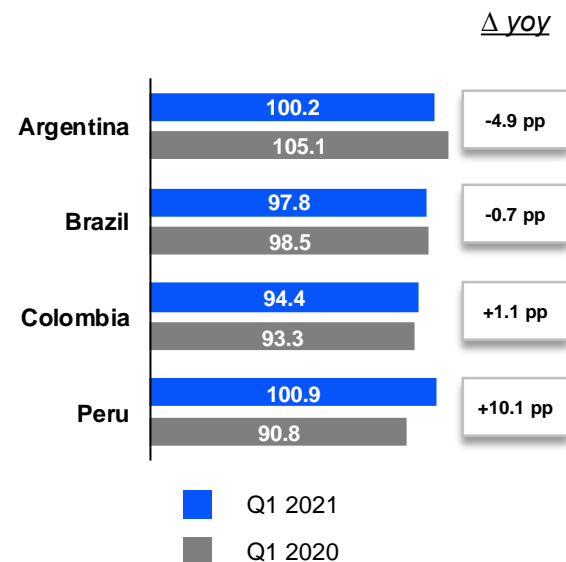

Currencies vs USD¹ (Δ YoY)

Closing remarks

Management actively working on mitigating the impacts of a still challenging environment

Demand recovery continues in Brazil

Solid debt metrics and cash cash flow generation to ensure business continuity

Start of a greener phase of growth for Enel Américas

First Quarter

Annexes

Regulation Update Q1 2021

Argentina

- On January 19, 2021, the ENRE issued the Resolution No. 16, which initiates the procedure for the transitory adjustment of tariffs with the purpose of establishing a Transitional Tariff Regime, until a Definitive Renegotiation Agreement is reached. Additionally, it establishes that it will facilitate the realization of different instances of participation.
- On March 30 and 31, the public hearing was held to deal with the transitory tariff, while the process of the Integral Tariff Review, which must be completed before 2023, continues.

Brazil

- Public Hearing 005/21: ANEEL held public hearing from February 11, 2021 to March 29, to discuss the reimbursement of tax credits due to the exclusion of the ICMS tax from the PIS / COFINS tax calculation base. The initial proposal is returning it to consumers in five years via energy bill discount.
- Enel Rio's Tariff Adjustment: On March 9, 2021 ANEEL's board of directors approved the final figures of Enel Rio's Tariff Adjustment, which is in force as of March 15, 2021. The result led to an average effect perceived by consumers of +6,02%.
- Normative Resolution No 928/2021: ANEEL implemented provisional rules to adapt to the Covid-19 pandemic in order to preserve the provision of the electricity distribution service, which will be in force from April 1 to June 30, 2021. The main measure is to suspend the cut to low-income consumers, consumers with life support equipment and health services units, manufacturing, distribution and vaccines and serums, blood banks and legal medical institutes.

Colombia

- Res. CREG 003/2021: It confirms the formula for calculating the subsidies applicable to the consumption of electricity and fuel gas of residential users of strata 1 and 2.
- Res. CREG 004/2021: Establish procedure to calculation of discount rate (WACC) applicable to tariff methodology by regulation energy and gas commission.
- Res. 40060/2021 Ministry of Mines and Energy : Commercial agents that serve regulated and non-regulated market, are obliged to ensure that 10% of annual energy purchases destined to end users come from non-conventional renewable energy sources.
- National Energy Plan 2020-2050 – UPME: It defines a long-term vision for the Colombian energy sector and identify the possible ways to achieve it and the trade-offs between them, it presents technological and economic aspects associated with the energy transformation.

Peru

- Due to the COVID-19 pandemic, the Peruvian Government declared the state of national emergency up to April, 30th. Lima is considered as a extreme risk region, reason why some restrictions to economic activities applies (such as restricted capacity for malls, supermarkets, banks and others) and mobility is forbidden on Sundays.
- Law No. 31112 was published establishing the prior control of business concentration operations. With the entry into force of this law, after its bylaws and other regulatory adjustments are approved, the contents of Law No. 26876 will be repealed with the exception of Article 13, which modifies the Article 122 of Decree Law No. 25844, Electricity Concessions Law (related to concentration restrictions in the electricity sector) as well as Emergency Decree No. 013-2019 that established the prior control of business concentration operations as of March 01, 2021.
- By Supreme Decree N° 003-2021-EM, Electric Concession Bylaw was modified in order to introduce some flexibility on transport contracts (currently on 100% ship or pay condition) for thermal units.
