CFO

3Q 2022 key highlights

Operational performance

Net production and energy sales up 8% and 12% mainly due to Brazil and Colombia

Tariff adjustment in Sao Paulo and tariff review process in Peru in line with expectations

Strong growth in Enel X and Retail

Financial results

Q3'22 EBITDA of US\$ 1.1 bn;
+17% 9M'22 EBITDA

+59% FFO improvement on better NWC and EBITDA

Net debt/EBITDA of 1.4x¹ remains stable

Push on renewables

71% RES capacity, 73% of RES net production

~100 MW RES added in Q3 2022; ~400 MW added in 2022

2.9 GW capacity in execution, 0.6 GW added in Brazil²

Asset rotation & Corporate simplification

Asset rotation on track: Fortaleza sale completed; Goiás sale approved by anti-trust authority³

Merger of Enel Gx Peru with EGP Peru ongoing

SEC⁴ deregistration process well on track

Current scenario

Inflation starts to peak across the region, significant COP depreciation affects results

Asset rotation & Corporate simplification

Extraordinary operations in line with our strategy and goals

Asset rotation

- **Fortaleza sale completed: Brazil 100% renewable**, with **Wind & Solar** representing ~75% of installed capacity
- **Goiás sale well on track**: CADE approval received, ANEEL approval pending. Process completion expected by **year-end 2022**

Corporate simplification

- **Merger analysis of Enel Gx Peru with EGP Peru**: Process of integration of generation assets under analysis
- **SEC¹ deregistration well on track**

Annexes

Regulation Update Q3 2022

- **Res. ENRE 314/22 & 435/22:** On September 9, the ENRE approved the values of the Tariff Structure for Edesur, effective as of September 2022. They include new seasonal prices for residential segments (increase of 40%) and non-residential segments under 300 kW (increase of ~25%). No adjustment was applied to the remuneration related to VAD.

- **Government resources used to reduce tariffs:** (i) Privatization of Eletrobrás and (ii) Transfer from Itaipu.
- **Market Opening – Ordinance Nº 50/2022:** Allows consumers that pay binomial tariff, with load below 500 kW, to purchase electricity from any supplier as of January 2024. This ordinance enables around 106 thousand new consumers to migrate to the free market.
- **Market Opening Public Consultation MME Nº 137/2022:** Presents a draft ordinance for the opening of the market for all low voltage consumers (group B). The proposal maintains the segregation between wholesale and retail, with low voltage consumers who decide to access the free market represented by a retail agent at the CCEE. On the schedule, commercial and industrial consumers are expected to be able to freely choose their supplier from 2026, as well as residential and rural users from 2028.

- **Res. CREG 101-027/2022:** Establishes the change of IPP for the calculation of the unit cost and the possibility of temporary modification of the indexing factors that determine the income and charges by network operators / national transmitters.
- **Res. CREG 101-029/2022:** Publishes transitory measures to adjust the prices and indexers of long-term energy contracts and defer the payment obligations of marketers.
- **Res. CREG 101-031/2022:** Modifies Res. CREG 101-027/2022 and Res. CREG 101-029/2022 on measures to counteract increases in the rate of electricity service to the end user.

- VAD published on October, 16h. Comments on this published document can be presented up to Nov, 8th (its presentation is under analysis).
- New VAD values represent an increase in revenues by US\$ 12 millions per year.
- New tariffs will be applied as of November, 1st 2022.

- **Panama** - Short-term tender ETESA (ETESA 01-21): The awarding process for the contracting of energy for the period from Nov-2021 to Dec-2023 was completed.
- **Costa Rica** - Law for the promotion and regulation of distributed energy resources from renewable energies

Disclaimer

This presentation contains statements that could constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements appear in a number of places in this presentation and include statements regarding the intent, belief or current expectations of Enel Américas and its management with respect to, among other things: (1) Enel Américas' business plans; (2) Enel Américas' cost-reduction plans; (3) trends affecting Enel Américas' financial condition or results of operations, including market trends in the electricity sector in Chile or elsewhere; (4) supervision and regulation of the electricity sector in Chile or elsewhere; and (5) the future effect of any changes in the laws and regulations applicable to Enel Américas or its subsidiaries. Such forward-looking statements reflect only our current expectations, are not guarantees of future performance and involve risks and uncertainties. Actual results may differ materially from those in the forward-looking statements as a result of various factors. These factors include a decline in the equity capital markets of the United States or Chile, an increase in the market rates of interest in the United States or elsewhere, adverse decisions by government regulators in Chile or elsewhere and other factors described in Enel Américas' Annual Report or Form 20-F. Readers are cautioned not to place undue reliance on those forward-looking statements, which state only as of their dates. Enel Américas undertakes no obligation to release publicly the result of any revisions to these forward-looking statements, except as required by law.
